

**Supercharge Your Photos to 1,000 DPI.**

**Introducing Noritsu's  
SUPER SHIMON SOFTWARE**

Noritsu M300

For over 30 years, Noritsu has provided law enforcement agencies across the US with professional photo-processing equipment and expert photo printing solutions. In response to customer requests, we are proud to introduce our next generation software, Super Shimon, which increases the optical resolution of our DP Series and M300 printers to an amazing 1,000 dpi. Super Shimon enables crime labs to maximize the output quality of crime scene photos and to produce highly-detailed fingerprint images.

For outstanding photo printing performance and reliability, join the over 100 Federal, State and Municipal law enforcement agencies that trust Noritsu to reduce operational costs, improve lab turnaround and provide the best output quality in the industry.

**NORITSU**  
RELIABLE SOLUTIONS. EVERLASTING MEMORIES
